

## FANtastic Google Apps Developer for APEC Sought!

Project Title	FANtastic Google Apps Developer for APEC Sought!
Project Summary	You will help the U.S. Mission to Vietnam build and deploy a mobile device accessible processes and databases to manage the administrative side of the annual APEC Summit in Vietnam and other U.S. government activities in Southeast Asia.
Country	Vietnam
Agency	Department of State
DoS Office	N/A
Post	HO CHI MINH CITY
Section	IM
Number of Interns	1

## Project Description

The Asia-Pacific Economic Cooperation (APEC) is a regional economic forum established in 1989 to leverage the growing interdependence of the Asia-Pacific. This year's meetings will be in Vietnam, and the applications developed will have long-term benefit for future government meetings in the Asia-Pacific region.

The VSFS eIntern will help the U.S. Mission to Vietnam use the Google suite of applications to help us:

- Build databases for U.S. government travelers
- Track funding sources
- Register and apply for third-country visas and credentials
- Track work processes and overtime
- Run reports on activities

This will be a fantastic opportunity to use your developer skills to help our e-Government efforts.

## Desired Skills Interests

## **Additional Information**

You will be part of the IRM team which falls under the management section. Your ability to learn about the functioning of our mission and your skills to utilize this knowledge to create a website as a tool for APEC management will be invaluable.

## **Language Requirements**

*None*
